

Skid-Lift Yearly Inspection Log Decals

Skid-Lift now places inspection decals on all of its new lifts and offers the inspection decals free of charge to all customers with older lifts. We also include an inspection marking decal that can be used to mark the month and the year of the inspection. These decals can be seen below and should be placed just above the lower control tower on the basket as shown. If you do not have these decals on your lift, please add them in the area shown below.

Annual Inspection Forms and Instructions can be found on our website on the service tab along with procedures for performing service. These should be filled out and filed after every yearly inspection. You should also make a copy of the inspection form and place it in the manual case for review by users if needed. Lift should be inspected every 13 months according to lift safety guidelines.

Decals can be added by spraying a little soapy water on the backside of the decal after peeling off the adhesive back strip. Once in position, use a credit card or driver's license to squeeze out the water behind the decal. Allow 5 minutes for the decal to adhere to the lift.
